

INTERACTIVE

robuRIDE™

ROBOSOFT, LOFTUS MULTIMEDIA,

and FIGURA have joined their expertise to build the most exciting interactive rides. Thanks to its expertise in robotics, ROBOSOFT now launches a new line of interactive rides for amusement parks. The highest technologies have been introduced to get completely autonomous and really interactive dark rides. These people movers carry players or passengers into not yet explored spheres.

This is the ultimate solution to combine visitors entertainment and ease of management

Coordinated with a scenography, robuRIDE™ will lead passengers in another dimension.

The platform can go through any path: from the simple show performed while moving, to a fully robotized environment, to create a unique action game. Animatronics displayed all over the scenery react to players performances by a wide variety of anthropomorphic movements, bringing life to the game, and involving players like never before.

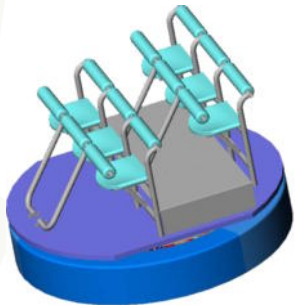

Low cost solution

- Virtual guiding system (inductive wire, laser)
- Light infrastructure
- Centralized and automated fleet management system
- Customizable vehicles

Efficiency

- Non passive ride = FUN
- Multiple path (high score = extra path)
- Variable speed to recreate rushes and "real living" environment
- Goes down and uphill
- Completely safe

Platforms are made of two parts:

Upper part:

- Customizable
- Rotate on its own axis (small robuRIDE™ only)
- Optional attached infrared guns
- Optional on board multimedia system
- Optional on board hits counter

Lower part:

- Robotized platform
- Wire or laser guided
- 2 or 4 wheels drive (electric powered)
- Completely silent

2 models available:

		
speed	up to 2 m/s.	up to 8 m/s.
passengers	6	22
path length	up to several kilometers	
fleet	from 1 to 40 robuRIDES™	
operation time	about 10 hours a day
