

## Solutions

# Valve fuel cap

for manipulation-free refueling

## Applications

Robosoft's valve fuel cap, is designed for fast integration on any type of bus. It allows manipulation-free refueling to save time and ensure reliable tight closing.

## Functionnalités

- > Standard refuelling nozzle (ZVA 25 type)
- > Full waterproofness
- > Compatible with any fuel tank with custom interface
- > Quick and easy setup
- > EURO 4 compliant
- > Ready for automated refueling

## Main technical features

- > PA 6.6 with 30% fiberglass, injected
- > Overall diameter : 120 mm
- > External thickness : 5 mm
- > Refuelling hole diameter : 47 mm
- > Tank pipe interface diameter : 90 mm
- > Easy fixation to bus body : 6 stainless screws (to be installed / replaced from outside)
- > Valve : Automated closing valve with spring.
